

Table of Contents

1. Scope	1
2. Reference documents	1
3. MAU and device types	2
3.1 Definitions	2
3.1.1 Bus powered device.....	2
3.1.2 Separately powered device	2
4. Type 111 MAU profile — twisted or shielded pair, standard-power signaling, bus powered, entity model I.S.	3
4.1 Receive filters	3
4.2 I.S. Parameters	4
4.3 Labeling	4
4.4 Conformance Testing.....	4
5. Type 112 MAU profile — twisted or shielded pair, standard power signaling, separately powered, entity model I.S.	5
5.1 Receive filters	5
5.2 Galvanic Isolation.....	6
5.3 I.S. parameters	6
5.4 Labeling	6
5.5 Conformance Testing.....	6
6. Type 113 MAU profile — twisted or shielded pair, standard-power signaling, bus powered, non I.S.	7
6.1 Receive filters	7
6.2 Labeling	8
6.3 Conformance Testing.....	8
7. Type 114 MAU profile — twisted or shielded pair, standard-power signaling, separately powered, non I.S.	9
7.1 Receive filters	10
7.2 Labeling	10
7.3 Conformance Testing.....	10
8. Type 115 MAU profile — twisted or shielded pair, standard-power signaling, bus powered, energy limited (Ex nL)	11
8.1 Receive filters	12
8.2 Hazardous Location Parameters	12
8.3 Labeling	12
8.4 Conformance Testing.....	12
9. Type 116 MAU profile — twisted or shielded pair, standard-power signaling, separately powered, energy limited (Ex nL)	13
9.1 Receive filters	13
9.2 Galvanic Isolation.....	14
9.3 Hazardous Location Parameters	14
9.4 Labeling	14
9.5 Conformance Testing.....	14
10. Type 511 MAU profile — twisted or shielded pair, standard-power signaling, bus powered, FISCO I.S.	15
10.1 Receive filters	15
10.2 I.S. parameters	16
10.3 Labeling	16
10.4 Conformance Testing.....	16
11. Type 512 MAU profile — twisted or shielded pair, standard-power signaling, separately powered, FISCO I.S.	17
11.1 Receive filters	18
11.2 Galvanic Isolation	18
11.3 I.S. parameters	18
11.4 Labeling	18
11.5 Conformance Testing.....	18
12. Type 411 MAU profile — single fibre, high sensitivity, separately powered, I.S.	19
12.1 Conformance Testing.....	20
13. Media for 31.25 kbit/s networks	21
13.1 Twisted- or shielded-pair wire media	21
13.2 Bidirectional single optical fibre media.....	21
14. Accessories for 31.25 kbit/s twisted- or shielded-pair wire fieldbus networks	23

14.1	Power supply profiles	23
14.2	Terminator profile	25
14.3	Intrinsic Safety barrier profile	25
14.4	Galvanic isolator profile	26
14.5	Device Couplers	27
15.	Accessories for 31.25 kbit/s fibre optic fieldbus networks	28
15.1	Optical Passive Star Coupler Profiles	28
15.1.1	Type 421: 100/140µm (A1d) type passive star coupler	28
15.1.2	Type 422: 200/230µm (A3c) type passive star coupler	29
15.1.3	Type 423: 50/125µm (A1a) type passive star coupler	29
15.1.4	Type 424: 62.5/125µm (A1b) type passive star coupler	29
15.2	Optical Active Star Coupler Profiles	30
15.2.1	Type 431: Optical Active Star Coupler with timing regeneration function	30
15.2.2	Type 432: Optical Active Star Coupler without timing regeneration function	31
15.3	Optical / Electrical Fieldbus Converter Profiles	31
15.3.1	Type 433: Optical/Electrical Fieldbus Converter with timing regeneration function	32
15.3.2	Type 434: Optical/Electrical Fieldbus Converter without timing regeneration function	32
