

Table of Contents

1.	Scope	1
2.	Overview	1
3.	System Management Architecture	2
3.1	System Management Information Base	2
3.2	System Management Interactions	3
3.2.1	System Management Kernel/User Application Interactions	3
3.2.2	System Management Kernel/FMS Interactions.....	4
3.2.3	System Management Kernel/LME Interactions.....	4
3.2.4	System Management Kernel/Data Link Layer Interactions	4
4.	System Management Model	4
4.1	System Management Functions	5
4.2	System Management Process	6
4.2.1	Device Classes and Address Assignment	6
4.2.2	SMK States	7
4.3	System Management Information Base	7
4.4	System Management Constraints	8
4.4.1	Scope of Names and Tags.....	8
4.4.2	Address Ranges.....	8
5.	System Management Services and Procedures	10
5.1	General Features	10
5.1.1	Local Reset	10
5.1.2	System Management Timers	10
5.1.3	System Management Function Execution.....	10
5.1.4	Conventions for Sequence Diagrams	11
5.2	Address Assignment	11
5.2.1	Address Assignment for Field Devices	12
5.3	Device Identification.....	27
5.3.1	SM_IDENTIFY Service	27
5.3.2	SM_IDENTIFY Service Sequences	28
5.4	Application Clock Synchronization.....	29
5.4.1	Protocol Description	29
5.4.2	Generating Clock Messages	30
5.4.3	Republishing Through Bridges.....	36
5.5	Locating Application Tags.....	36
5.5.1	Model	36
5.5.2	Services	36
5.6	Function Block Scheduling.....	40
5.6.1	Model	40
5.6.2	Objects.....	40
5.6.3	FB_START Service.....	40
6.	SMK Protocol	42
6.1	Abstract Syntax.....	42
6.1.1	General Substitutions.....	42
6.1.2	SM PDU	42
6.2	Standard Management VCR.....	45
7.	System Management Tables	46
8.	System Management Information Base Definition	47
